

APARNA A

Software Developer

✉ aparna08120@gmail.com ☎ 9562289125 📍 Kochi, India 🌐 LinkedIn 📄 Git 📁 Portfolio

Profile

Motivated Software Developer skilled in building scalable, database-driven web applications. Proficient in Python, Django, REST APIs, MySQL, PostgreSQL and frontend technologies. Passionate about creating efficient, secure solutions through teamwork and continuous learning.

Skills

Technical Skills :

- **Languages:** Python, JavaScript (ES6+), HTML5, CSS3, SQL
- **Frameworks:** Django, Flask, Django REST Framework, Angular, Bootstrap
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools & Platforms:** Git, GitHub, RESTful APIs
- **AI & ML Frameworks:** TensorFlow, PyTorch, scikit-learn, OpenCV
- **Data Tools:** NumPy, Pandas, Seaborn, Matplotlib

Soft Skills :

- Communication, Leadership, Management, Adaptability, Self Learning

Professional Experience

Cryoflame Technologies LLP

12/2025 – Present | Kochi

Python Developer

Technologies: Python, Django, HTML5, CSS3, JavaScript, Bootstrap, MySQL, Razorpay, Regex, PIL(Pillow).

- Managed complete backend development and implemented server-side logic using Django to build scalable and secure web applications.
- Designed and structured the project workflow, ensuring smooth development, testing, and deployment of the eCommerce platform.
- Developed and maintained an eCommerce website with Razorpay payment gateway integration for secure and seamless online transactions.
- Built and customized a powerful admin panel with full CRUD functionality to manage products, users, orders, and website content efficiently.
- Optimized database queries, integrated APIs, and performed debugging and testing to enhance performance, reliability, and user experience of the application.

Ziya Academy LLP

06/2025 – 12/2025 | Kochi

Python Developer

Technologies: Django, Django REST Framework, PostgreSQL, OpenCV, Pillow, Python, API Integration

- Led a team of interns and contributed as a backend developer in a live Django project for employee & intern management.
- Developed RESTful APIs with Django REST Framework for attendance, leave, and task management with role-based access (Super Admin, Admin, User).
- Integrated facial recognition (OpenCV) for remote attendance and QR code scanning for on-site tracking; used Pillow for image processing.
- Designed and optimized PostgreSQL/MySQL schemas, ensuring secure data handling, modular code, documentation, and testing.
- Mentored interns on coding practices, debugging, and project lifecycle management.

Technologies: Python, Django, Flask, Tkinter, HTML5, CSS3, JavaScript, Bootstrap, SQLite, MySQL, Regex, Angular.

- Developed multiple Python applications including a GUI calculator (Tkinter), a form with regex validation, and a Contact & Employee Management System using OOP and CRUD operations.
- Built web projects such as a To-Do app and Student Management System in Django with CRUD functionality and authentication.
- Designed responsive front-end projects including a Facebook-style registration page, a web calculator, and a Bootstrap-based webpage.
- Practiced extensive SQL queries for data manipulation and retrieval to strengthen database skills.

Technologies: Python, OpenCV, NumPy, PIL (Pillow), TensorFlow, PyTorch, Jupyter Notebook.

- Developed and integrated ML techniques into the product using OpenCV, NumPy, and PIL; contributed to building the ML architecture.
- Executed manual testing to validate application functionality and identify bugs.
- Delivered presentations to the team, sharing insights on new technologies and machine learning advancements.

Projects

Kanthimantra - Ecommerce Website

- Developed a full-featured Ayurveda eCommerce and CMS web application with product categories, subcategories, shopping cart, and wishlist functionality for seamless online purchasing.
- Integrated Razorpay payment gateway to enable secure online payments and implemented complete order management and checkout workflow.
- Built a dynamic admin panel with full CRUD operations to manage products, users, orders, and CMS content including banners, pages, and SEO settings.
- Implemented SEO optimization, responsive UI, and efficient backend logic to enhance search visibility, user experience, and overall website performance.
- **Technologies:** Python, Django, MySQL, HTML5, CSS3, JavaScript, Bootstrap, Razorpay, PIL(Pillow)

PearlLadiesGallery – Ecommerce Website

- Developed a full-featured ecommerce website for cosmetic products (moisturizer, lipstick, sunscreen, etc.) with user registration, login authentication, and product browsing/search.
- Implemented Add to Cart, cart management, order summary, and checkout flow to ensure a smooth user shopping experience.
- Integrated Razorpay Payment Gateway for secure online payments, including order creation and payment verification.
- **Technologies:** Python, Django, HTML, CSS, JavaScript, Bootstrap, Razorpay API and PostgreSQL.

WhatsApp Chat Analysis

- Developed a Python-based tool to analyze WhatsApp chat data, utilizing machine learning and natural language processing techniques.
- Extracted and cleaned raw chat data to structure it for analysis, handling timestamps, user messages, and media files.
- Generated key insights including word frequency, most active users, chat timelines, and sentiment analysis to understand user behavior and communication patterns.
- Presented results through interactive visualizations such as bar graphs, word clouds, and time-based activity charts for better user interpretation.
- **Technologies:** Python, pandas, NumPy, matplotlib, seaborn, wordcloud, re(regex).

Emotunes

- Developed a web-based music recommendation system using Python and Machine Learning that suggests songs based on users’ emotions to enhance their listening experience.
- Implemented emotion detection algorithms to analyze facial expressions or sentiment data and automatically recommend songs that match the user’s current mood.
- Built two interactive modules – Admin Module for managing songs, user accounts, and recommendations, and User Module for accessing emotion-based playlists.
- Integrated Flask framework to connect the machine learning model with the web interface and manage communication between the frontend and backend efficiently..
- **Technologies:** Python, ML, Flask, HTML, CSS, JavaScript, and MySQL.

Automated Attendance and Salary Management System

- Developed a web-based system for automating employee attendance tracking and salary calculation.
- Implemented two modules: Admin (manage employees, attendance, salary) and User (view attendance, salary details).
- Integrated machine learning techniques to improve accuracy and reduce manual errors.
- **Technologies:** Python, Flask, HTML, CSS, JavaScript, MySQL.

Education

Master Of Computer Application <i>Saintgits College Of Engineering,Kottayam</i>	2022 – 2024
Bachelor Of Computer Application <i>College Of Applied Science, Perissery</i>	2019 – 2022
Higher Secondary Education <i>Chinmaya Vidyalaya, Chengannur</i>	2017 – 2019
Secondary Education <i>Chinmaya Vidyalaya, Chengannur</i>	2016 – 2017

Certificates

• Learning Python	LinkedIn Learning, Dec 2024
• UI Developing Workshop	Techrish Pvt Ltd, Aug 2024
• Web Development Basics	IBM SkillsBuild, Jul 2024
• MERN stack	Camerinfoiks Pvt Ltd, Aug 2023
• Machine Learning through Python Workshop	ICFOSS, Nov 2022
